Junior Web Developer

Personal Profile

An enthusiastic, dedicated, and high-performing individual with about 6 years of experience as a Radiographer for the NHS. I've grown to appreciate the vital role IT plays in healthcare. Working with modern imaging software and equipment, as well as PACS, RIS and other digital systems, has fuelled my interest in IT. I've learnt the value of teamwork, attention to detail, and adhering to stringent deadlines. My passion for IT and software development prompted me to participate in a 12-week IT and software development training program, where I am gaining fundamental understanding of software and web development. The program offers technical training as well as hands-on project work to demonstrate my newly learnt skills. My goal is to improve and broaden my present skill set so that I can pursue a successful career in software development.

I have a strong background in programming languages such as Python and JavaScript, as well as familiarity with web development frameworks. My zeal for problem solving and creativity motivates me to always learn new technologies and enhance my coding skills.

I'm delighted to contribute my passion and technical skills to a company that encourages development and creativity.
